| 02/2026 – 08/2026 | <b>Elevate Tech</b> <br><i>Flutter Developer Internship (Remote)</i> <ul style="list-style-type: none"><li>• Built production-level cross-platform apps using Flutter and Dart.</li><li>• Applied Clean Architecture, MVVM/MVI, and BLoC/Cubit to build scalable, maintainable, robust, and production-ready mobile applications.</li><li>• Integrated RESTful APIs with Dio, Dependency Injection, backend and third-party services efficiently for reliable application functionality.</li><li>• Collaborated in Agile/Scrum teams and actively used AI tools for development, debugging, problem solving, and continuous improvement.</li></ul> |
| 11/2025 – Present | <b>Pearson</b> <br><i>Instructor (Part time)</i> <p>Delivered Pearson courses, developing students' problem-solving skills while assessing performance, providing practical guidance, and introducing AI tools.</p>                                                                                                                                                                                                                                                                                                                                                                                                                              |

---

## TECHNICAL SKILLS

---

### Flutter & Dart

Flutter, Dart, Android, iOS, State Management (BLoC/Cubit, Provider), REST APIs, Dio, Retrofit, Dependency Injection, Firebase (Authentication, Firestore, Storage, Push Notifications, Analytics, Crashlytics, App Distribution), Google Maps, Stripe Payment Integration, Agora, Flavors

### Architecture & Software Engineering

Clean Architecture, Software Engineering, Software Design, MVVM/MVI, Design Patterns, OOP, Dependency Injection

### Testing, Debugging & Security

Unit Testing, Widget Testing, Flutter DevTools, Debugging, Secure Storage, Code Obfuscation, Environment Variables (.env), Refresh Tokens, Secure API Authentication

### CI/CD & Deployment

GitHub Actions, Fastlane, Codemagic, Shorebird, Application Deployment, CI/CD

### AI Tools

ChatGPT, Claude, GitHub Copilot, Gemini, Ollama, VS Code AI/Agent Mode, Antigravity

Other Technical Skills

Version Control (Git, GitHub), MySQL, Data Structures, Algorithms, HTML, CSS, JavaScript

| PROJECTS          |                                                                                                                                                                                                                                                              |
|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 07/2026 – 08/2026 | <b>Fitness App</b> <a href="#">↗</a><br>Developed a fitness application featuring an AI powered chat model, meal planning, exercise guidance, and workout tracking. Integrated AI capabilities to provide personalized fitness related assistance.           |
| 06/2026 – 07/2026 | <b>Driver App</b> <a href="#">↗</a><br>Developed a driver app for delivery management, implementing order acceptance, status workflows, and real-time location tracking with Google Maps. Integrated Firestore and push notifications for real-time updates. |
| 05/2026 – 06/2026 | <b>Flowery App</b> <a href="#">↗</a><br>Developed an e-commerce app with authentication, product management, cart, checkout, order tracking, and REST API integration.                                                                                       |
| 04/2026 – 05/2026 | <b>Exam App</b> <a href="#">↗</a><br>Developed an exam application for taking timed quizzes, answering questions, and tracking exam scores and results.                                                                                                      |
| 09/2024 – 07/2025 | <b>InOne App</b> <a href="#">↗</a><br>Developed a social and review platform featuring AI-powered agents, personalized recommendations, community-driven reviews, and real-time voice/video communication using Agora.                                       |
| 10/2023 – 11/2023 | <b>Movies App</b> <a href="#">↗</a><br>Developed a movie application for discovering movies, exploring details and reviews, searching titles, and receiving personalized recommendations.                                                                    |

| EDUCATION         |                                                                                                                                              |
